SUMMARY

Frontend Engineer with expertise in React, Next.js, and building user-focused, scalable web applications. Worked on various projects with proven ability to translate complex requirements into functional, user-centric code.

SKILLS

React, Next.js, TypeScript, JavaScript, Tailwind CSS, HTML5, CSS3, MongoDB & Git.

PROJECTS

K-Blog

Live link

Fullstack Next.js Engineer (Frontend heavy)

- Architected a responsive, content-heavy blog platform using a "mobile-first" design philosophy, featuring a clean card-based layout and intuitive navigation to enhance user engagement.
- Developed reusable UI components—including interactive hover states, hero carousels, and a categorized sidebar—prioritizing performance and maintainable clean code.
- Implemented a Google authentication system using Next Auth and providing “Create” page to enable users create their own articles and gain credit as authors when they publish it on the app.
- Engineered a scalable content management system by integrating MongoDB with the frontend, ensuring high data integrity and implementing dynamic routing to mirror production-grade, data-driven applications.

Dev-Events Platform

Live link

Fullstack Engineer

- Built a platform using Next.js where developers and tech enthusiasts can be informed of upcoming events and book slots to attend, complete with an intuitive design and smooth mobile responsiveness.
- Gave each event its own unique page URL using dynamic routing and linked various similar events using shared tags.
- Implemented a form for users to book a spot to upcoming events by creating API routes, showcasing a deep understanding of how client-side data relates with the server.

Amazon Clone

Live link

Frontend Engineer

- Built an amazon clone complete with projects and a cart system using React with TypeScript demonstrating a strong understanding of how React is used in common world examples.
- Made it fully responsive so that it retains its allure and functionality whether viewed on large, medium screens or mobile devices.

EDUCATION

B.Sc. in Computer Engineering, University of Lagos. Class of 2026.
